

PACKAGING DECLARATION

Company Name: MEF NUTRI SCIENCE GIDA A.Ş.

Address: Teknopark İSTANBUL, Pendik, İSTANBUL, TÜRKİYE

Date: 20.01.2025

We, MEF NUTRI SCIENCE GIDA A.Ş., hereby declare the following regarding the packaging of our products:

1. Industrial Product Packaging:

- Our **industrial products** are primarily packaged in **multi-layer kraft bags**. These robust and eco-friendly bags are designed to ensure the protection of our products during transport and storage, while maintaining product integrity and quality.
- The multi-layer kraft packaging provides excellent strength and is resistant to external elements, ensuring that the contents remain safe from contamination or damage during the supply chain process.
- Additionally, we adhere to strict quality control measures to ensure that all bags are securely sealed and meet the necessary durability standards.

2. Private Label and Branded Products Packaging:

- For our **private label** and **branded products**, we use a variety of packaging solutions, including **multi-layer laminated aluminum pouches, composite film sachets, plastic and metal jars, and doypack pouches**. These packaging materials are selected to preserve the freshness, quality, and shelf life of our products, while offering convenience and ease of use for our customers.
- **Multi-layer laminated aluminum pouches** and **composite films** are used for their excellent barrier properties, providing protection from moisture, light, and air, ensuring that the products maintain their intended quality and flavor.
- **Plastic and metal jars** are utilized to offer a durable and practical option for packaging, particularly for products that require easy access and resealability.
- **Doypack pouches** are utilized for their lightweight and space-saving qualities, while also maintaining product integrity and ease of handling.

3. Quality Control and Detection Systems:

- To ensure the highest level of safety and quality, **metal detectors** are employed specifically for packaging materials containing aluminum. This advanced technology ensures the early detection of any foreign metal particles that could potentially contaminate the product, maintaining a high standard of product safety.
- We also utilize highly sensitive **checkweighers** to verify the accuracy of the product weight in each package, ensuring that the correct amount is provided for each product and preventing any discrepancies.

4. **Sustainability and Regulatory Compliance:**

- We are committed to **sustainable packaging** and actively strive to reduce our environmental impact. We use recyclable materials whenever possible and ensure that all our packaging is compliant with relevant environmental regulations and standards.
- We also stay up-to-date with packaging legislation, ensuring that all packaging materials used meet the necessary food safety and regulatory requirements for the markets we serve.

This declaration is made in good faith, based on current packaging practices and product information. It is subject to updates based on changes in our packaging methods, materials, or regulations.
